EDUCATION

2+2 Dual Degree Program: Feng Chia University (FCU)/ San Francisco State University (SFSU) *Sept. 2022 - May 2026*

- GPA: **3.9/4.3** (ranking 5/31 in FCU International School of Technology and Management)
- GPA: **3.62/4.0** (SFSU)

PROJECTS EXPERIENCE

Software Engineer, **File System**, San Francisco State University, CA

Jan. 2025 - May 2025

C/Makefile

- Designed and built an Operating system to emulate linux kernels within the Virtual Machine.
- Working on the implementation of a FAT-based file system in C and building commands for getting in from linux terminal.

Full Stack Software Engineer, **Kpoptify**, San Francisco State University, CA

Aug. 2024 - Dec. 2024

HTML&CSS/JavaScript/SQL

- Developed a network planning and branch optimization web application for K-pop listeners as well as resolving many back-end performance issues with Google recaptcha API to optimize user experience.

ML Engineer, **Body Shape Detector**, Feng Chia University, Taichung, Taiwan

Feb. 2024 - June 2024

Python(MATLAB)

- Built extensible and scalable integration pipelines with 3 body types and automated 80% of the correct classifications.
- Worked on improving accuracy experience by reducing the loss rate for optimizing models by 90%.
- Helped recognize the awareness of how body types would indicate people's health.

Cyber Algorithms Engineer, **DSA Implementation**, Feng Chia University, Taichung, Taiwan

Feb. 2024 - June 2024

Python

- Led a team of 5 engineers to launch a simulation application with DSA, sha256 SDK built.
- Built a password protection system on the web.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Association for Computing Machinery/ Workout Club (SFSU)

Chief Financial Officer

- Engaged in the fundraiser department, managing over 50 attendees fund setup, and ensuring the preparation of activities.
- Participated in the joint organization, arranging event logistics, and engaging in the bench press competition.

SIDE PROJECTS & HOBBIES

Danistudios - A personal website that helps people discover aesthetic perception, and inspires people to make a social impact.

Randaily - Built a random task application based on users' interests in the iOS system and created a considerable potential.

SKILLS

Programming Languages: Python/SQL/C/C++/HTML&CSS/NodeJS/JavaScript(React)

Platforms: AWS/Visual Studio Code/Google Analytics/Virtual Machine/Cursor/Xcode/MySQL/MATLAB

Knowledge: Machine Learning (Regression, Random Forests, Regularization), Deep Learning (CNN, RNN, LSTM, GAN, Reinforcement learning, Transformer), Statistics (Data visualization, Experimental design, Time series)
